Electronic components and circuits are very sensitive to electrostatic discharge. Although our company designs anti-static protection for the main interfaces on the card when designing circuit board products, it is difficult to achieve anti-static safety protection for all components and circuits. Therefore, it is recommended to observe anti-static safety precautions when handling any circuit board component (including X508). Anti-static safety protection measures include, but are not limited to the following:

- a) The smart box should be placed in an anti-static bag during transportation and storage, and then the board should not be taken out during installation and deployment.
- b) Before touching the smart box, discharge the static electricity stored in the body: wear a discharge grounding wrist strap.
- c) Operate the smart box only within the safe area of the electrostatic discharge point.
- d) Avoid moving smart boxes in carpeted areas.

## Precautions and after-sales maintenance

matters needing attention

Before using the product, please read this manual carefully and keep it for future reference;

- Please pay attention to and follow all warning and guidance information marked on the product;
- Please use matching power adapter to ensure the stability of voltage and current;
- Please use this product in a cool, dry and clean place;
- Do not use this product in cold and hot alternate environment to avoid condensation damage components;
- Do not splash any liquid on the product. Do not use organic solvent or corrosive liquid to clean the product;
- Do not use the product in dusty and messy environment. If it is not used for a long time, please pack the product;
- Do not use in the environment with excessive vibration, any dropping or knocking may damage the circuit and components;
- Do not plug and unplug the core board and peripheral modules when power is on;
- Please do not repair or disassemble the product by yourself. In case of any fault, please contact our company in time for maintenance;
- Do not modify or use unauthorized accessories by yourself, and the damage caused will not be warranted;

After sales maintenance

### 1) Warranty period

- Base plate, core plate : 3 year (non-human damage)
- Other peripherals sold by the company: 1 year (non-human damage)

### 2) Warranty description

- Within 7 days: the product (base plate, core module) is not damaged by human, our company will replace / repair it free of charge, and bear the return freight; (because the core module needs NVIDIA to confirm that it can meet the requirements of repair, it will take a long time, we will coordinate as soon as possible, please forgive for the inconvenience)
- From 7 days to 36 months: the product (base plate, core module) is not damaged by human, our company will repair it free of charge, and bear the return freight; (because the core module needs NVIDIA to confirm that it can meet the requirements of repair, it will take a long time, we will coordinate as soon as possible, please forgive for the inconvenience)
- Artificial damage in more than 3 year or 3 year: the product (carrier plate) shall be tested after it is sent to the customer, and the customer shall be informed of whether it can be repaired and the maintenance cost in detail. After reaching an agreement, the product shall be repaired and returned to the customer, and the company shall bear the return freight;
- Starting time: the core module is subject to the original factory delivery time, and the loading plate is subject to the express delivery receipt date;

### 3) Contact information

Official website: [www.realtimesai.com](http://www.realtimesai.com)

Taobao website: <https://shop340963258.taobao.com/>

Address: 11, block B, Heping Xiyuan, Heping West Street, Chaoyang District, Beijing

Attention: RMA

Tel: 400-100-8358

Mailing notice: contact with the company's sales department in advance, arrange technical support personnel to check and eliminate errors caused by misoperation as soon as possible, fill in the product after-sale return to factory maintenance form after verification, and send it to [rma@realtimes.cn](mailto:rma@realtimes.cn) Mail box, please attach the list of items to facilitate verification, so as to avoid loss and loss in the process of express delivery. The company does not receive any delivery

## Technical support and development customization

### 1. Scope of technical support

- 1) The company releases the electrical characteristics and use of industrial carrier boards and modules;
- 2) Physical dimension of hardware, relevant structure diagram and line sequence definition of specific interface;
- 3) Burn in verification of all BSP support packages provided by the company;
- 4) The company released burn environment construction, entry-level use. ;
- 5) Various peripheral module drivers released by the company;
- 6) The company's product fault diagnosis and after-sales maintenance services;

### 2. Scope of technical discussion

Due to the wide range of embedded system knowledge and various types of involvement, we can not guarantee that all kinds of questions can be answered one by one. The following content is not available for technical support, only suggestions can be provided.

- 1) Knowledge beyond the course published by our company;

- 2) Specific software program design;
- 3) Technical support for industrial carrier not issued by the company;
- 4) All kinds of driving support for industrial carrier board not issued by the company;
- 5) Hardware principle and drive design of peripheral module not issued by our company;

### 3. Technical support mode

- 1) Official website or email questions (recommended):

<https://www.realtimesai.com/cn/download.html>    [techsupport@realtimes.cn](mailto:techsupport@realtimes.cn)

- 2) Official Taobao through Alibaba Wangwang consultation: <https://shop340963258.taobao.com/>

- 3) Wechat group consultation (wechat Group No. consults Taobao customer service or sales, and Taobao purchase order No. needs to be provided for verification);

- 4) Technical support email: [techsupport@realtimes.cn](mailto:techsupport@realtimes.cn)

- 5) Tel: **400-100-8358**

### 4. Technical support time

Monday to Friday; 8:30-12:00 am; 1:00-17:30 PM;

The company arranges the rest according to the national legal holidays, during which it may not be able to provide technical support, please send the problem to the technical support email. We will reply to you as soon as possible on weekdays.

### 5. Complaints and suggestions

If you are not satisfied with us or have suggestions, you can send an email to [yu.qin@realtimes.cn](mailto:yu.qin@realtimes.cn) For feedback, please call **400-100-8358** for further improvement.

### 6. Customized development services

The company provides the embedded operating system driver based on NVIDIA Jetson series and the paid customized development service of hardware carrier board to shorten your product development cycle.

Please email the request to [info@realtimes.cn](mailto:info@realtimes.cn)

## Data acquisition and subsequent update

### 1. Access to information

Download on our website

The company's website contains supporting information of its products, including product Product Manual, NVIDIA Jetson series module data manual, BSP driver support package for carrier board, supporting peripheral driver files, interface test verification method, FAQ, system burning guide, etc. get into [www.realtimesai.com](http://www.realtimesai.com) , select "data download" in the navigation bar, find the data you need, and click download.

### 2. . Subsequent updates

Updates of subsequent documents, BSP, driver files and other official account will be updated in time.

We will pay close attention to our developments in order to ensure that your information is up to date.

We will push through WeChat public.

# Product presentation

## 1 Product introduction

X508 is one based on NVIDIA Jetson™ AGX Xavier series™ module design of your new feiyun box, built-in integration 512 nuclear Volta™ architecture of GPU AGX Xavier module, Ubuntu 18.04 operating system, with 32 tflops floating point arithmetic AI processing capacity, super strong light aluminum alloy material design, transmitting heat, no fan structure have excellent heat dissipation capacity, the overall size is small and light, good structure of human body engineering, obligate has easy the wing structure of installation, It has the stable operation capability of 7x24 ultra-long MTBF on site, which can be applied to autonomous machines such as robots, unmanned delivery vehicles, intelligent gate machines and intelligent sales containers, etc. It is an ideal carrier for deploying AI computing power for deep learning at the edge.

### 1.1 Feature

- Compatible with nvidia Jetson™ AGX XAVIER module
  - ◆ GPU: NVIDIA Jetson™ AGX XAVIER 521 core with NVIDIA Volta™ architecture and 64 Tensor Cores (32 trillion floating-point operations per second)
  - ◆ CPU: ARMv8.2 (octal-core)
  - ◆ Operating system: Linux pre-installed
  - ◆ Memory: 32GB LPDDR4
  - ◆ Storage: Built-in 32GB or expandable TF card slot
- 2 x USB3.1 (TYPE-A and TYPE-C (1A max output current))
- 2 x USB3.0 (TYPE A and TYPE-C (support usb2.0 and usb3.0 signal, 1A max output current))
- 2 x Gigabit Ethernet
- 1 x Micro SD card slot
- 1 x Micro SIM card slot
- 2 x HDMI TYPE A interface
- 1 x Mini PCIE interface
- 1 x Camera interface
- 1 x Fan interface
- 2 x M.2 key M interface
- 1 x M.2 key E interface
- 4 x GPIO compliance with 3.3V voltage level
- 3 x 3.3V UART interface
- 2 x CAN interface
- 1 x SPI interface
- 1 x I2C interface
- 1 x I2S interface
- Size: 192mm×115mm×87mm
- Power input: +9V~+20V
- Temperature: -25°C~+60°C
- Weight: 1827g

## 1.2 Ordering Information

Model Options	Functional Description
RTSS-X508(V2.0)	Xavier Cloud intelligence box cooling version, built-in Xavier 32GB module, pre-installed Ubuntu 18.04, built-in 32GB eMMC; 2 x USB 3.0, 2 x HDMI, 2 x GbE, 1 x Micro SD, 1 x Mini PCIe, 2 x USB3.1, 3 x 3.3V UART, 1 x 3.3V SPI, 1 x 3.3V I2C, 1 x 3.3V I2S, 4 x 3.3V GPIO, 2 x CAN 2.0, 2 x M.2 KEY M interface, 1 x M.2 KEY E interface, 4G module(optional); WIFI/BT optional; Power indicator light, power switch button, -25°C--+60°C; Including wire package (DuPont cable*1、TYPE-C To USB TYPE-A male head system flash cable*1); Includes power adapter, provides Realtimes Linux4Tegra software support package, 3C& CE certification
RTS-Xavier-AC/DC	Power Adaptor for X508-1/-2, 100-240VAC/12V/6A,72W
RTSV-6911i (optional ) Pro Capture Mini SDI (optional ) Pro Capture Mini HDMI (optional )	Mini-pcie Video Capture Card ,RTSV-6911i (8-channel D1 NTSC/PAL video input), Pro Capture Mini SDI (single-channel SDI video input), Pro Capture Mini HDMI (single-channel HDMI Video Input)
miniPCIe to M.2.M (optional )	mini-PCIe to M.2 Key M interface card
Eco Capture Dual SDI M.2 (optional) Eco Capture Quad SDI M.2(optional)	M.2 Video capture card, Eco Capture Dual SDI M.2 (dual-channel SDI video input), Eco Capture Quad SDI M.2(four-channel SDI Video input)
ME909S-821(optional)	mini-PCIe Full netcom 4G module.

### Order online:

Taobao Store : <https://shop340963258.taobao.com>Tmall Store : <https://feiyunzhihe.tmall.com/>Jingdong Store : <https://mall.jd.com/index-824786.html>

## 1.3 Wiring package configuration

Component	Number	Functional Description
System flash cable	1	TYPE-C To USB TYPE-A male head system flash cable
DuPont cable	1	Convert the multi-function needle discharge interface to the cable lead, which includes the following interface cables: 4 GPIO, 2 CAN, 1 Debug serial port, 1 serial port, button button lead.

# Product specifications

## 1 External interface function and location

X508 FRONT

X508 BACK And SIDE

## 2 Connectors Description

### 2.1 HDMI connector

<b>Function</b>	HDMI output interface	
<b>marking</b>	HDMI	
<b>Type</b>	HDMI connector	

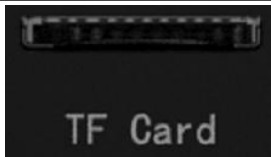

### 2.2 Ethernet connector

<b>Function</b>	Gigabit Ethernet connector	
<b>marking</b>	Ethernet1 Ethernet2	
<b>Type</b>	RJ45	

### 2.3 USB3.0 connector

<b>Function</b>	USB3.0 connectors	
<b>marking</b>	USB3.0	
<b>Type</b>	UBS3.0 Type-A	

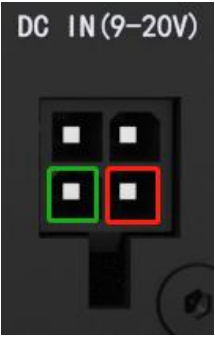

### 2.4 TF card connector

<b>Function</b>	TF card interface	
<b>marking</b>	TF CARD	
<b>Type</b>	Micro SD(TF)	

### 2.5 SIM card connector

<b>Function</b>	SIM card interface	
<b>marking</b>	SIM	
<b>Type</b>	Micro SIM	

## 2.6 Power input port

<b>Function</b>	Power input port			
<b>marking</b>	9~20V			
<b>Type</b>	4 Pin interface			
<b>Pin define</b>	<b>Pin</b>		<b>Signal</b>	
	1	GND	2	GND
	3	VCC	4	VCC
	In the picture on the right, the red is the pin "1", and the green is the pin "2". Input voltage: +9~+20V.			
				

## 2.7 LED

Mandatory Sign	Functional Description	Status description
PWR	Power indicator	Normally on - Power on

## 2.8 USB3.0 connector

<b>Function</b>	USB3.0 connectors	
<b>marking</b>	USB3.0/DP	
<b>Type</b>	USB Type-C	
<b>Pin define</b>	The bottom interface can be used for system programming, USB3.1 Type-C.	
		

## 2.9 Function pin

<b>Function</b>	Function pin insertion			
<b>LoGo</b>	Multifuntion-port			
<b>Type</b>	2.54mm pitch 2x17 Pin Dip			
<b>Pin define</b>	<b>Pin</b>	<b>Signal</b>	<b>Pin</b>	<b>Signal</b>
	1	VDD3V3_OUT	2	VDD3V3_OUT
	3	UART3_TX_DEBUG_CON	4	UART3_RX_DEBUG_CON
	5	UART1_TX_CON	6	UART1_RX_CON
	7	UART2_TX_CON	8	UART2_RX_CON
	9	SPI2_CLK/UART7_TX_CON	10	SPI2_MISO/UART7_RX_CON
	11	SPI2_MOSI/UART7_RTS_CON	12	SPI2_CS0/UART7_CTS_CON
	13	I2C_GP3_CLK_CON	14	I2C_GP3_DAT_CON
	15	GND	16	GND
	17	POWER_BTN_CON	18	RESET_BTN_CON
	19	RECOVERY_BTN_CON	20	RTC_EXT
	21	I2S3_DIN	22	GPIO04
	23	I2S3_DOUT	24	GPIO05
	25	I2S3_FS	26	GPIO20
	27	I2S3_SCLK	28	GPIO21
	29	GND	30	GND
	31	CAN1H	32	CAN1L
	33	CAN0H	34	CAN0L

In the right picture, red is pin "1" and green is pin "2".

The serial port level is 3.3V TTL logic level.

CAN has a transceiver.

**UART3 is the debugging port.**The mapping file in the /dev directory corresponding to UART1 and UART2 is ttyTHS0, ttyTHS1.

GPIO high level is 3.3V and GPIO is directly derived from Xavier,The mapping Numbers of GPIO04, GPIO05, GPIO20 and GPIO21 in the system are respectively:290、289、291、288

The mapping number of I2C in the system is: I2C-2.

### 3 Product size diagram

### 4 Hardware update history

#### X508 hardware update history

edition	Updata description
V1.0	Initial release

# Software version supporting instructions

X508 is a complete product with Jetson Xavier module as the core. Provide developers with one-stop terminal equipment to assist developers in application development.

X508 Feiyun Smart Box supporting software includes:

- L4T (Linux for Tegra): L4T provides "OS" for your Feiyun Smart Box, including Linux kernel, boot loader, board support package (BSP) and sample file system. (By default, the pure system has been installed for the device, Jetpack needs to be installed by itself)
- Jetpack: Jetpack sdk is the most comprehensive solution for building AI applications. It includes software libraries and apis, examples, developer tools and documentation for the latest and previous versions of Jetson products.

## 1 use

### 1.1 Smart box power on and start

- a) Ensure that the voltage of all external systems is turned off
- b) Install necessary external cables. (Such as: the display cable connected to the HDMI display, the power input cable to power the system, the USB cable connecting the keyboard and mouse ...)
- c) Connect the power cord to a power source.
- d) X508 adopts manual power-on design. Turn on the power and the system starts to work.

### 1.2 Recovery Mode

Jetson Xavier core modules can work in normal mode and Recovery mode. In Recovery mode, you can perform file system update, kernel update, boot loader update, BCT update and other operations.

To enter Recovery mode:

- a) Turn off the power supply to the system.
- b) Use a USB cable connection Z508's Type C USB (P10) port with Host(PC) develop host USB port.
- c) Short connect 15 and 19 pins of Button connector and supply power to the system. The power supply shall be maintained for more than 3 seconds, and then disconnect 15 and 19 pin short wiring of Button connector.
- d) The system enters the Recovery mode, and subsequent operations can be carried out at this point.

## 2 L4T (Linux for Tegra Abbreviation“L4T”)

L4T provides "OS" for your Feiyun Smart Box, including Linux kernel, boot loader, board support package (BSP) and sample file system.

X508 Smart Box is working on a system burned with the official original version of NVIDIA Linux For Tegra (L4T). HDMI, Gigabit Ethernet, USB2.0, serial port, GPIO, SD card, I2C bus can all be supported. But Mini-PCIe, M.2, USB3.0, fan interface, etc. cannot work normally.

For all support of X508 smart box interface, the supporting driver patch (BSP: Board Support Package) needs to be loaded. Use the flash method to program the system. SDK Manager to install all other JetPack components except L4T to make your Feiyun Smart Box up and running quickly.

For system programming documentation, please refer to "[Xavier system programming instruction manual](#)"

L4T and BSP can be downloaded from [Ruitai Cloud Space](#), and L4T can also be downloaded directly from the L4T main page on the Jetson developer site.

Please contact sales for the user and password of Ruitai Cloud Space.

## 3 Jetpack

Nvidia jetpack sdk is the most comprehensive solution for building AI applications. It includes software libraries and apis, examples, developer tools and documentation for the latest and previous versions of Jetson products.

### 3.1 Jetpack Component summary

This section briefly introduces each component of JetPack. For more detailed information about these components, please refer to JetPack's online documentation.

#### OS Image

JetPack includes a reference file system derived from Ubuntu. (Development kit system, no need to install)

#### Libraries and APIs

JetPack library and API include:

- TensorRT and cuDNN for high-performance deep learning applications
- CUDA for multi-domain GPU accelerated applications
- NVIDIA Container Runtime for containerized GPU accelerated applications
- Multimedia API package for camera application and sensor driver development
- VisionWorks, OpenCV and VPI for visual computing applications
- Sample application

### 3.2 How to install Jetpack

#### Overview of process steps

Installing JetPack to your Jetson device requires you to perform the following steps:

1. Download and install the NVIDIA SDK Manager on the Linux host.
2. Connect your jetson device to the Linux host (Type C USB or network (same network segment)).
3. Test your device can connect via ssh.
4. Use SDK Manager to select and install the required components.

#### Download and install the NVIDIA SDK Manager on the Linux host.

You must have a Linux host with internet access to run SDK Manager and refresh the developer kit. The supported host operating systems are:

Ubuntu Linux x64 Version 18.04 or 16.04

#### Download and install NVIDIA SDK Manager.

**sdkmanager** Installation package: **sdkmanager-[version].[build#].deb**

The current version is: **sdkmanager\_1.2.0**

**sdkmanager** install

**\$ sudo apt install ./sdkmanager-[version].[build#].deb**

## Connect your jetson device to the Linux host

Prepare your Jetson device for the following settings. (If the equipment system is not initialized, the system user needs to initialize after power-on)

- Connect the monitor, keyboard and mouse to the Jetson Feiyun smart box device (please refer to the interface description above).
- Use Type C USB cable to connect Linux host and Jetson Feiyun Smart Box (Type C USB or network (same network segment))
- During the setup process, SDK Manager will provide Internet connection for your jetson Feiyun Smart Box via Type C USB or network connection.
- Connect the supplied power adapter to the DC jack of the Feiyun Smart Box, and plug the AC interface into an AC power outlet.

## Test that your device can connect via ssh.

If connected via Type C USB, enter lsusb under the Linux host terminal to see the nvidia crop

The device can be accessed through ping or ssh commands

```
$ ping 192.168.55.1
```

or

```
$ ssh <jetson_user>@192.168.55.1
```

If connected via a network, check whether the device ip address is in the same network segment as the Linux host on the Feiyun Smart Box, and the Feiyun Smart Box device can be accessed through the ping or ssh command.

```
$ ping <jetson_ip>
```

or

```
$ ssh <jetson_user>@<jetson_device_ip>
```

## Use SDK Manager to select and install the required components

NVIDIA SDK Manager supports installing software to Jetson core (Flying Cloud Smart Box). For complete instructions, please refer to Chapter 5 of "[Xavier System Programming Manual](#)".

### 3.3 Sample application

JetPack includes several examples that demonstrate the use of JetPack components.

They are stored in the reference file system and can be compiled in the developer toolkit.

Component	Location
<a href="#">TensorRT</a>	/usr/src/tensorrt/samples/
<a href="#">cuDNN</a>	/usr/src/cudnn_samples_/
<a href="#">CUDA</a>	/usr/local/cuda-/samples/
<a href="#">Multimedia API</a>	/usr/src/tegra_multimedia_api/
<a href="#">VisionWorks</a>	/usr/share/visionworks/sources/samples/

	/usr/share/visionworks-tracking/sources/samples/ /usr/share/visionworks-sfm/sources/samples/
<a href="#">OpenCV</a>	/usr/share/OpenCV/samples/
<a href="#">VPI</a>	/opt/nvidia/vpi/vpi-/samples

### 3.4 Developer tools

JetPack includes the following development tools. Some are used directly on the Jetson system, and some run on a Linux host connected to the Jetson system.

#### •Application development and debugging tools

•[NSight Eclipse](#) version for GPU accelerated application development: runs on a Linux host. Support all Jetson products.

•[CUDA-GDB](#) for application debugging: Run on Jetson system or Linux host. Support all Jetson products.

•[CUDA-MEMCHECK](#) debug application memory error: run on Jetson system. Support all Jetson products.

#### •Application analysis and optimization tools

•[NSight Systems](#) for application multi-core CPU evaluation: run on a Linux host. Helps you improve application performance by identifying the slower parts of the code. Support all Jetson products.

•[NVIDIA@NIGHT™ compute Kernel Analyzer](#): An interactive analysis tool for CUDA applications. It provides detailed performance indicators and API debugging through user interface and command line tools.

•[NSight Graphics](#) for graphics application debugging and evaluation: a consolegrade tool for debugging and optimizing OpenGL and OpenGL ES programs. Run on the Linux host. Support all Jetson products.

### 3.5 Documentation

Documents related to developers using JetPack include:

- [JetPack Documentation](#)
- [VisionWorks Documentation](#)
- [Nsight Eclipse Edition Documentation](#)
- [CUDA-GDB Documentation](#)
- [CUDA-MEMCHECK Documentation](#)
- [TensorRT Documentation](#)
- [cuDNN Documentation](#)
- [CUDA Toolkit](#)
- [NVIDIA Container Runtime](#)
- [OpenCV Documentation](#)
- [Jetson Linux Multimedia API Reference](#)
- [Nsight Systems](#)
- [nvprof](#)
- [Visual Profiler](#)
- [Nsight Graphics](#)
- [Nsight Compute CLI](#)
- [VPI–Vision Programming Interface](#)

## Terms of Warranty

### Important note

Each embedded product provided by Realtimes Technology is free from any defects in material and process,fully in line with the specifications officially issued by the original factory.

Realtimes Technology warranty covers the original products,If the parts configured by the dealer are out of order, please consult with the dealer to solve the problem. All the baseplate and core modules provided by Ruitai New Era (Beijing) Technology Co., Ltd. are guaranteed for 3 years, while the other peripherals are guaranteed for 1 year (life-long maintenance service is provided if the warranty period is beyond the warranty period).The warranty period starts from the date of delivery, for the products repaired within the warranty period, the repair parts shall be extended for 12 months.Unless notified by Realtimes Technology, the date of your original invoice shall be the date of shipment.

### How do I get warranty services

If the product does not work properly, Please contact Realtimes Technology or dealer for warranty service, please show invoice when product warranty(this is the proof for you getting warranty service).

### Warranty solution

When you ask for warranty service, please follow Realtimes Technology warranty process,You will need to receive your first diagnosis from a technical engineer by phone or by email,at that time,we need you to cooperate with us to fill in all the questions on the RMA form provided by us. Once we accurately determine the cause of the fault and the location of the damage ,we will provide the charge list for the out of warranty products,which needs your confirmation.Realtimes Technology keep the right to repair or replace the products. If the product is replaced or repaired, the replaced faulty product or the repaired and replaced faulty parts will be returned to Realtimes Technology.

For products under warranty,the customer shall bear the freight when the product is returned to the manufacturer,Realtimes Technology will bear the ship cost of the products after maintenance.

### The following conditions are not covered by the warranty terms

- a) Improper installation, improper use, misuse and abuse of products(Overloading, for example).
- b) Improper maintenance and storage (Such as fire, explosion, etc) or natural disasters (such as lightning stroke,earthquake,typhoon,etc)
- c) Personal unauthorized changing the product(such as changing circuit characteristics, mechanical characteristics, software characteristics,Conformal coating).
- d) Other failures which are clearly due to misuse(such as overvoltage,polarity reversal, the pin bent or broken,the wrong connection,drop damage,transportation damage,damage due to over operating temperature and so on).
- e) The logo and part number on the product have been deleted or removed.
- f) The product is out of warranty.

## Special concerns

If the same fault multiple occurrence for the products,in order to find out the reason causing the problem,we will request the users to provide the specific documents or information of peripheral equipment,such as monitor,I/O boards,cables,power supply, diagram and structure of the system,etc.If such documents or information are not available,we have the right to refuse to perform the warranty, the repairsments will be charged accordingly.

**Rev.C 6/2020**
